- UV-stabilized ABS plastic housing
- Impact-resistant ABS
- Door sealed with an EVA gasket for water resistance

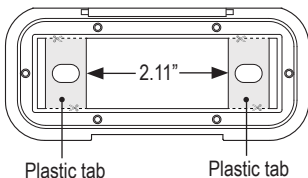

Product Overview

Installation

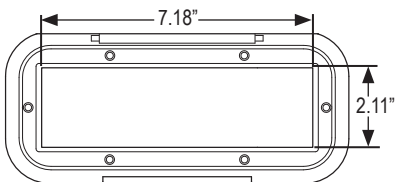

Step 1

If your single DIN head unit does not fit in the center opening of the radio cover, use a proper tool to cut out the two tabs (ABS plastic) in the center opening.

Step 2

The head unit installation opening is 7.18" x 2.11". Attach your single DIN head (7" x 2.0") unit to the radio cover through the opening, then place in the supplied EVA ring around the head unit face for shock absorption and added protection against the elements.

Step 3

Secure the radio cover in the dash via the six screw holes using the supplied screws and clip nuts. Make sure the head unit is securely attached.
