BRYSTON

BRYSTON  
IN  
NORWAY

Hello James.

Just an homage to you and Bryston for the great Bryston Model T10 speakers.

I have spend 20 months with them working hard with placement of speakers and seating position. Also got some room acoustics in place. Plugged 2 of the 4 ports and actually got improved 25Hz response.

The result are so impressive and groundbreaking to me, truly reference quality soundstage. A true full range speaker with awesome dynamics and a lot of headroom. So natural sounding and with lifelike performance.

I have had some visitors from the HiFi business and also from the HiFi press, they all are truly impressed by your product.

Thank you!

Best regards  
Dag Johnsen
