

VPAS841

UNDER-SEAT BASS SOLUTION WITH VEGA BASS +
4 CHANNEL OUTPUT FOR ADDITIONAL SPEAKERS

All-in-One Solution with VEGA BASS Built-In

The VPAS841 is the ultimate mobile audio upgrade, offering a compact yet powerful solution to elevate your vehicle's sound system. Designed with innovative features for seamless installation and optimized performance, this under-seat enclosure is perfect for cars, trucks, golf carts, and other vehicle applications.

With four full-range output channels and a dedicated subwoofer channel, the VPAS841 is a true all-in-one audio solution. The integrated outputs allow you to drive additional speakers, providing rich, full-range sound throughout your vehicle. Whether upgrading your factory audio or starting from scratch, the VPAS841 ensures a dynamic and immersive listening experience.

The VPAS841 is engineered for easy OEM integration, featuring 20V line-level inputs, auto turn-on circuits, and an ultra-compact design for hassle-free installation in almost any vehicle. To address challenges with OEM audio signals and enhance overall sound quality, the VPAS841 includes:

Dual Bass Controls:

One is for precise level adjustment, and the other is powered by Cerwin Vega's exclusive VEGA BASS, bass enhancement circuit for deeper and richer bass.

Advanced Filters: Standard low-pass and subsonic filters ensure optimal frequency control.

Phase Adjustments: For seamless blending of subwoofer and full-range speakers.

Built around an 8" subwoofer with 450W MAX power the VPAS841 delivers robust bass performance in a space-saving enclosure. Its ability to power additional speakers through the full-range outputs makes it the ideal choice for creating a cohesive, high-quality audio system without the need for multiple components.

Transform your vehicle's sound system with the VPAS841—your all-in-one solution for deep bass, clear highs, and full-range audio excellence.

FEATURES

- 4.1 System: Subwoofer and 4 Channel Outputs
