

## WIRING INSTRUCTIONS

The Red & Black Wires are to be connected to the corresponding outputs of a source unit or power amplifier.

Systems that exceed 75 Watts will require a 15 Ohm, 120 Watt resistor (not included) to be inserted between the positive output of the source unit/amplifier & the positive wire of the SRX1 tweeter.

## MOUNTING INSTRUCTIONS

SRX1 tweeters may be mounted by affixing the snap-on base to the desired mounting surface using either self adhesive tape or a #6 self tapping screw – both are included in the package.

Before applying the self-adhesive tape, it is recommended to clean the mounting surface and snap-on base with denatured alcohol. Once the snap-on base is secured, press the SRX1 tweeter gently but firmly into the base.
