

Paradigm®

GARDEN OASIS ESSENTIALS OUTDOOR MUSIC SYSTEM

Proven Paradigm Performance

We put the same care and dedication to quality sound into Garden Oasis Essentials as we do all our audio products. If you already enjoy Paradigm's legendary sound indoors, this system takes it outside.

Garden Oasis Essentials includes patented technologies like Reduced Edge Diffraction (RED), which provides cleaner and more powerful midrange sound thanks to a unique tweeter housing. With irregular edges and an off-center placement, you won't have any of the standing wave artifacts that reduce performance in traditional designs.

Reduced Edge Diffraction (RED™) Technology
Patent Pending

The Neighbor-Friendly Music System

With the balanced presentation Paradigm is known for, Garden Oasis Essentials can fill your outdoor space with sound without bothering the neighbors. Even coverage means you won't have to turn up the volume to enjoy music at comfortable levels with no hotspots or dead zones.

Everything You Need in One Box

Paradigm's legendary sound is easy to achieve outdoors with Paradigm's Garden Oasis Essentials, an all-in-one package with 8 speakers and ground stakes, 1 in-ground subwoofer and 20 waterproof wire connectors for easy installation in outdoor spaces up to 3,000 square feet. All you need to add is speaker wire and amplification.

Technical Specifications

	SATELLITE SPEAKERS	INGROUND SUBWOOFER
Design	2-driver, 2-way outdoor satellite, acoustic suspension	Inground subwoofer with single high excursion driver
Crossover	100Hz High pass; 2nd-order electro-acoustic at 3 kHz	200Hz Low pass
High Frequency Driver	3/4" (1.9cm) X-PAL™ dome, ferrofluid damped / cooled, Reduced Edge Diffraction (RED™) Technology, Perforated Phase-Aligning (PPA™) Tweeter Lens, die-cast low diffraction baffle/heat sink	N/A
Bass/Midrange Driver	4" (10 cm) mineral-filled polypropylene cone, Nitrile-Butadiene Rubber (NBR) surround	N/A
Bass Driver	N/A	8" (20.3 cm) woofer with dual 8ohm voice coils. Water resistant materials and design.
Low Frequency Extension	90 Hz	45 Hz
Frequency Response (0-15 degree window)	± 4 dB from 100 Hz - 20 kHz (design axis 45 degrees)	34 dB from 47 Hz - 170 Hz
Sensitivity — Outdoor	76 dB	89 dB
Sensitivity — Anechoic	72 dB	85 dB
Suitable Amplifier Power Range	15 – 400 W (system, per channel)	15 – 400 W (system, per channel)
Maximum Input Power	25 W	200 W
Impedance	Minimum 4ohms mono	Minimum 4ohms mono
Dimensions (diameter x depth)	4.9" (diameter) x 6.7" (depth) (12.5 cm x 17 cm)	22" (including canopy) x 13.8" (56 cm x 35 cm)
Weight	3.0 lbs. (1.4 kg)	17.7 lbs (8kg)
Finish	Dark Satin Brown	Dark Satin Brown (canopy only)

System & Installation

You won't need special amplifiers to power Garden Oasis Essentials. If you already have a second zone-enabled AV receiver, then you have the necessary electronics. Of course, you can step up to a dedicated power amp for even better performance.

Garden Oasis Essentials is easy to install with stakes and speaker housings that assemble without tools. All that's needed to finish the job is a shovel and a pair of wire strippers. Just add speaker cable.
