

**EXCEEDS
AMERICAN WIRE
GAUGE STANDARDS**

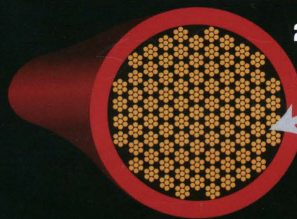

Rockford Fosgate accessories are designed and engineered in accordance with the AWG or American Wire Gauge specification – which is *THE STANDARD* method of denoting wire diameter.

Don't be fooled by competitors that use cost-cutting/no specification wire with thick jackets to hide 25% - 50% less copper.

Illustrations for graphical representation only

**MORE COPPER...
MORE POWER...
BETTER SOUND!**

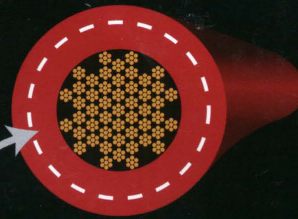

OURS
4 GAUGE (AWG) WIRE

1,862
copper strands

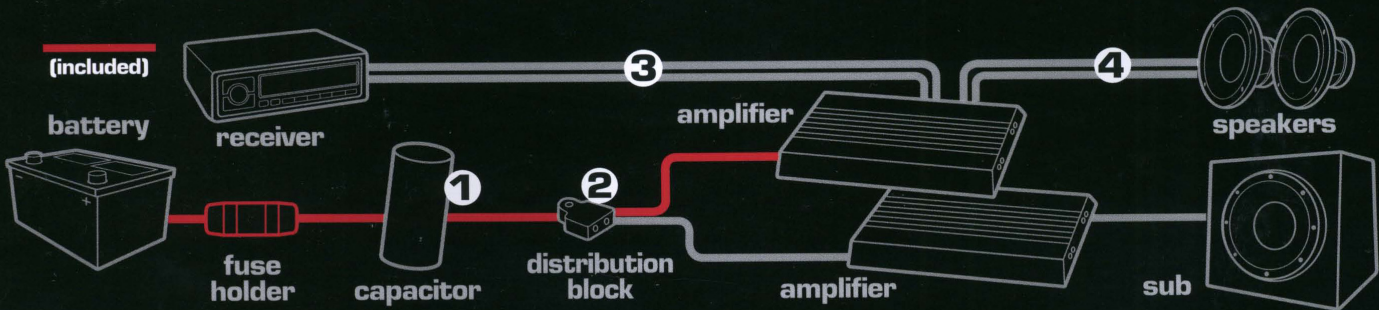

Our true 4 Gauge (AWG) wire has 2X more copper and a jacket with no filler to deliver **MAXIMUM** power

VS. THEIRS
4 GAUGE WIRE

735
copper strands

Their 4 Gauge wire has **60% LESS COPPER** and a filler jacket to deliver **MINIMAL** power

Don't Forget...

- 1 Capacitors** - Keep your amps stable and your speakers from distorting. Delivers more **BASS!**
- 2 Distribution Blocks** - Use on main power wires to distribute power to multiple components.
- 3 Signal Cable** - Twisted construction eliminates noise for increased clarity and superior sound.
- 4 Speaker Wire** - High strand count copper wires ensure maximum output.
