

S12

Center Channel Speaker Stand

PRODUCT DESCRIPTION

The S12 center channel speaker stand is designed for enthusiasts looking to extract every detail from their larger center channel speakers and premium soundbars. Featuring 16 degrees of upward tilt, the S12 directs sound precisely toward the listener's ears for a flawless, on-axis response while elevating the speaker to minimize early reflections from furniture surfaces. Its heavy-duty bent metal construction and integrated foam dampening effectively absorb unwanted vibrations, eliminating distracting room resonances and rattling. The low-profile silhouette ensures your TV can remain at an optimal height, offering a more ergonomic viewing experience than bulky pedestal stands. Built to support substantial equipment, the S12 is compatible with center channels and soundbars 5.7" to 10" deep and up to 32 lbs.
