

Era 100 Pro

SONOS

The ultimate all-in-one speaker solution for businesses and homes.

Sonos Era 100 Pro

Sonos Era 100 Pro looks, sounds, and works like the Sonos speakers you know and love, but with key features for an installed system. Precision-engineered, Era 100 Pro packs beautifully rich and detailed sound into a sleek, versatile design.

Sonos with PoE: Single-cable simplicity

Era 100 Pro works on Power over Ethernet (PoE) to streamline setup. With PoE, you don't have to place speakers near power outlets, and you can count on a wired connection for enhanced reliability, speed, and performance. A secondary wireless connection provides even more flexibility. Enjoy convenient, cost-effective operation and peace of mind.

Era 100 Pro is optimized for PoE+ but can also run on PoE. For more information on selecting the right devices, contact your installer.

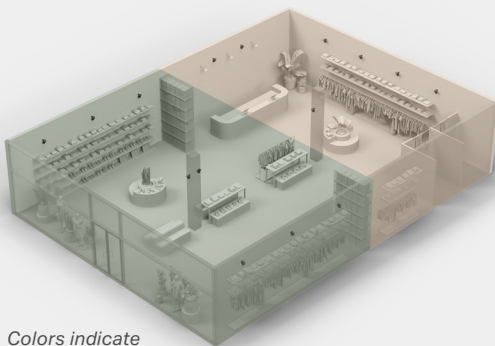

The Sonos app: Curation and control

The Sonos app provides music streaming content, control, and system management together in a single platform. Sonos supports more than 100 streaming services, including Soundtrack Your Brand, Mood Media, Spotify, Amazon Music, Pandora, Apple Music, TIDAL, and Sonos Radio, available in free and premium tiers.*

*Commercially licensed music is legally required in business environments.

Era 100 Pro Surface Mount (sold separately)

The Era 100 Pro Surface Mount provides flexible, secure speaker positioning and an elegant, clutter-free aesthetic. Mountable on virtually any surface, it includes built-in theft deterrence, 30° pan and tilt angles and 360° rotation. The mounting plate accommodates hidden or exposed cabling, for even more installation options.

Colors indicate different zones.

Zones: Streamlined system management

Enjoy easier system control with dedicated zones, where multiple speakers work together in sync. Play different music in each zone, and temporarily group zones together to manage sound in larger spaces or for specific events.
