

V300 ULTIMATE

SOLAR POWERED 4G-LTE AUTONOMOUS SECURITY CAMERA

The V300 ULTIMATE is the ultimate outdoor surveillance solution for even the most remote locations, offering unparalleled peace of mind and security. Thanks to its advanced solar-powered technology and based on the 4G-LTE cellular network, this autonomous security camera provides year-long performance without the need for cables or power outlets. With its motion-activated and live streaming mode the V300 ULTIMATE allows you to keep a watchful eye on your property 24/7, no matter where you are. Whether you're looking to protect your property or business, the V300 ULTIMATE is the perfect choice for hassle-free, autonomous surveillance in the most challenging conditions.

YEAR-LONG PERFORMANCE

The V300 ULTIMATE camera comes with a high-capacity 15,000 mAh external solar power bank and offers continuous power and unparalleled autonomy. Providing 6 to 12 months of uninterrupted surveillance, its oversized solar panel ensures year-long performance without the need for recharging or maintenance.

EASY ACTIVATION

With the V300 ULTIMATE, activation is a breeze thanks to the preactivated SIM card that comes included with every camera. And with our free 7-day trial, you can determine which plan is best for your needs between three options starting at just \$10/mo. Smart notifications keep you informed of any motion detected.
