BRYSTON TRIM T10 SPEAKER DEALER FEEDBACK

I'd like to take a minute to share some words and my first experience with the new speaker line the Bryston T10 Series. Having been in this industry since 1982 I can honestly say if nothing else my ear and my ability to hear all the things we talk about as self proclaimed audiophiles is above average. I am absolutely positive that in all the days I've listened critically to music have I had such an amazing experience as I did with the pair of Bryston Trim T10 speakers!

I was absolutely 'BLOWN AWAY' by so many things. The ability to hear each instrument and actually have the system place it in a rock solid non wavering place on the stage was absolutely incredible James.

If you choose to share any or all of this with other dealers and or fans I could go on forever with the "music" critical listening I'm currently enjoying.

Many thanks,
Scott Linskey
