Seeing beyond

More discoveries.

With optics from ZEISS.

“More” is the keyword in nature observation. Birders want to discover more, see more details and identify more species – more of everything. ZEISS responds to this with more technical innovations dedicated to the fulfillment of the needs of nature lovers. And this, in turn, guarantees more unique discoveries.

Enabling more diversity.

The aim is to enable birders to find and observe even the best-hidden birds for periods long enough to allow for clear identification by distinguishing unique plumage, coloring and

other details, whether in dense reeds, bushes or woodland. The new ZEISS Victory SF 32 binoculars were created for these moments.

Discover the decisive details.

In the world of birding, the test of ornithological expertise is not so much the identification of beautiful and brightly colored species. It is much more the fine plumage structures that are rarely identifiable at first glance. The various different harrier species can, for example, only be distinguished by fine details. With the Victory SF, ZEISS has developed binoculars with exceptional sharpness and color fidelity that are able to resolve and render all these distinguishing details as they are in real life.

Use the hashtags #zeissnature and #zeissbirding to share your birding experiences and the latest checks on your list with us online.

More discoveries.

The ZEISS Victory SF line.

The ZEISS Victory SF line is the result of close collaboration between ZEISS engineers and experts in the field of birdwatching. The new ZEISS Victory SF 32 is designed and constructed to fulfill the needs of birders and wildlife enthusiasts and sets new standards, particularly in the areas of ergonomics, image quality and field of view.

Specially developed for birdwatching.

ZEISS Victory SF 32.

- 90% light transmission.
- UFL Concept guarantees brilliant and true-to-life color rendition.
- Wide field of view (465 ft at 1,000 yds).
- Ergonomic design for hours of fatigue-free observation.

ZEISS Victory SF 32

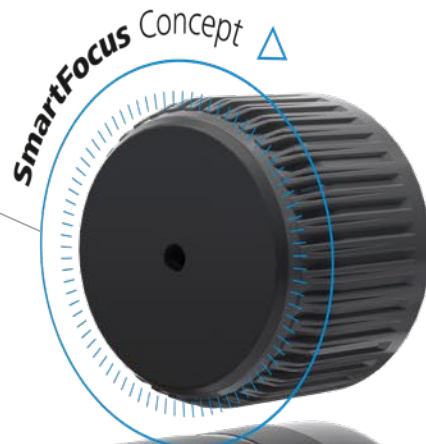

8 × 32, RRP \$2,249.99

10 × 32, RRP \$2,299.99

SmartFocus Concept

ensures **optimum positioning of the focusing wheel**, and it takes **only 1.6 turns** to focus between the closest focusing distance and infinity. Extremely fast and precise focusing is assured.

Extremely Wide Field of View

increases the observable area of interest by up to 20% in comparison with other binoculars. This offers you the best possible overview for locating the exact bird you are looking for.

20% more observable area than comparable competitors

True-to-Life Image Quality

UFL (Ultra-Fluoride) Concept guarantees the **highest resolution and color fidelity** to enable recognition of the finest details in seconds and confirm identification of bird species.

UFL Concept

Balanced Ergonomics

The ErgoBalance Concept shifts the **center of gravity of the binoculars closer to the eyepieces**. This enables hours of fatigue-free observation.

- heavy
- light

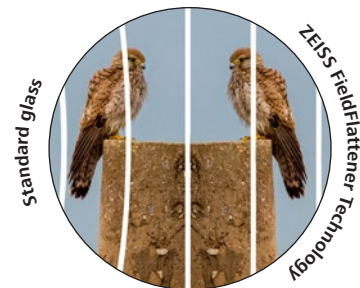

Seaside Sparrow (*Amospiza maritima*)

Loyal companions.
The most versatile.

The best for every situation.
ZEISS Victory SF 42.

- 92% light transmission.
- UFL Concept for a brilliantly bright and clear viewing experience.
- Incomparably wide fields of view.
- ZEISS FieldFlattener Technology: extreme edge sharpness, even with wide fields of view.
- Perfect ergonomics: ErgoBalance and SmartFocus concept for fatigue-free observation.

ZEISS FieldFlattener Technology provides extreme edge sharpness, even with wide fields of view.

ZEISS Victory SF 42
8x42, RRP \$2,699.99

Discover the heart and soul of nature.
Spotting scopes from ZEISS.

The most powerful spotting scope from ZEISS.
ZEISS Victory Harpia.

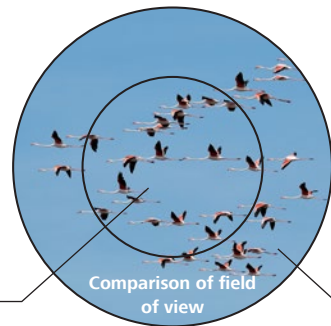

- Objective body magnification offers a subjective angle of view of 72° throughout the entire zoom range.
- The slim eyepiece offers comfortable viewing and features a bayonet mount for safe and secure locking.
- DualSpeed Focus enables automatic switching between rapid and fine adjustment for fast and precise focusing.
- LotuTec® coating ensures a clear view in all weather.
- Up to 70-fold magnification and objective lens diameters up to 95 mm.

ZEISS Victory Harpia
Harpia 85, RRP \$3,699.99
Harpia 95, RRP \$3,999.99
Harpia Eyepiece, RRP \$800.00

ComfortVision Concept

A subjective viewing angle of 72° throughout the entire zoom range for a noticeably broader overview of the terrain.

Spotting scope with 30x minimum magnification

Comparison of the field of view of a spotting scope with 30x min. magnification (small circle) with the field of view of the Harpia at 23x min. magnification (large circle).

Victory Harpia at 23x minimum magnification

The explorer's companion.
ZEISS Conquest Gavia 85.

- Large focusing ring for precise handling and easy focusing on the target subject.
- Magnesium body and compact dimensions ensure light weight and easy handling.
- Exceptionally precise roof prisms and an HD lens system ensure a bright and clear viewing image.

ZEISS Conquest Gavia 85
(including eyepiece)
 RRP \$1,999.99

How to capture the perfect moment.
ZEISS digiscoping.

Some wonders of nature are so incredibly perfect that they simply must be captured forever, to refresh the memory of such a wonderful moment and share its beauty with others. With ZEISS digiscoping accessories for compact and system cameras, you can.

ZEISS photo adapter

Whether for still pictures or film, our photo adapter allows you to mount a digital camera on our spotting scopes and transform them into powerful telephoto lenses.

ZEISS photo adapter

Available in different thread sizes:

	RRP for Harpia	RRP for Gavia
M49	\$79.99	\$69.99
M52	\$79.99	\$69.99
M58	\$79.99	\$69.99

Whether captured through the Harpia with a camera or, shown here, with a smartphone:
Digiscoping delivers high-quality photographs of unique moments in the world of nature.

Protecting what we love.

ZEISS nature conservation projects.

ZEISS optics deliver fascinating observations and unforgettable moments to nature lovers and birdwatchers around the world. We strive to protect what we can see, which is why ZEISS actively supports numerous conservation projects.

BirdLife International

In Morocco, ZEISS and BirdLife International are working together to protect the northern bald ibis, one of the world's rarest birds, from extinction.

Young Birders Weekend – Cornell Lab of Ornithology

ZEISS and the Cornell Lab of Ornithology support the next generation of birders who are interested in a career in ornithology.

Migrant Bird Project Israel

Together with the Society for the Protection of Nature in Israel (SPNI), ZEISS protects various migration flyways over Israel.

Champions of the Flyway

The aim of this event is to promote birdwatching and simultaneously collect donations for the protection of birds. ZEISS sponsors several teams taking part in this 24-hour birdwatching marathon and helps with the organization of the opening gala.

Grassland/Reed Birds Conservation Programme

In collaboration with the Naturschutzbund Vorarlberg organization, ZEISS is dedicating its efforts to the protection of these birds by biotope management and intensive defense against predators.
